

GenFlex Scrub Pads and Handles

Item Description

Molded Plastic Handle and Scrub Pads

Item Number

W590030052

Product Information

Description

GenFlex Scrub Pads and Handles consist of abrasive scrub pads and molded plastic handles. The plastic handle is designed to hold the scrub pad during the application of GenFlex primers to EPDM and TPO roofing membranes.

Typical Properties – Scrub Pad

Property	Typical Values
Material	Solvent resistant nylon fibers – abrasive fiber (240 grit)
Color	Dark Grey
Dimensions	3" x 5" (76.2 mm x 127 mm)
Packaging	30 Scrub Pads per Carton

Typical Properties – Handle

Property	Typical Values
Material	Molded Polyethylene with micro fastening system
Color	Tan
Packaging	4 Handles per Carton

Application

Please refer to current GenFlex EPDM and TPO specifications and details for specific information.

1. Place the abrasive Scrub Pad on the bottom of the handle with positive pressure working the pad fibers into the micro fasteners. This will keep the Scrub Pad in contact with the handle during primer application.
2. After saturating the pad with primer, use continuous back and forth scrubbing stroked with forceful pressure to apply the primer to the membrane splicing area. Proper application will result in a membrane surface covered with primer with no streaks or puddles.
3. Each Scrub Pad is designed to prime approximately 100 – 200 feet of a 6" wide area. Pads should be changed regularly to improve both application and performance of the primer.
