Subject: Introduction of New GenPocket Kits

I am please to introduce two exciting new products to you: GenPocket E and GenPocket T. Our goal has always been to provide simpler and better ways to approach roofing details, and these two new penetration pocket kits do just that.

The GenPocket Kits contain all the necessary components to properly flash irregular penetrations up to 4" wide, or clusters of smaller penetrations. Each kit contains a large pre-molded penetration pocket made from high performance EPDM or TPO compounds. The pockets are designed to hold a rigid 2" high plastic insert that provides stability to support the pourable sealer inside, and a wide flange that can be bonded to the waterproofing membrane. The GenPocket Kits come packaged as follows:

<u>Product Name</u>	<u>Size</u>	<u>Qty</u>	<u>Product Number</u>	<u>List Price</u>
GenPocket E (EPDM)	6.7" I.D.	6 per kit	W590010147	\$188.33
GenPocket T (TPO)	6.0" I.D.	6 per kit	W590030260	\$181.67

Note: GenFlex Pourable Sealer and other necessary primers are not included in the kits and must be purchased separately.

The attached Product Data Sheets will provide you with additional information on the components within each GenPocket Kit, in addition to installation instructions and other key product information. Please visit the **BRAND NEW** www.GenFlex.com for information on all GenFlex Products.

Thanks for your continued support of GenFlex.

Sincerely,

Jim Burkett
