Subject: Introducing the GenFlex® GF One Edge Prefabricated Fascia System

I am very pleased to introduce a brand new prefabricated fascia system that was specially designed for, and available exclusively to, GenFlex Customers – **GF One Edge**. GF One Edge is a lower cost alternative to both traditional, shop fabricated gravel stop/fascia systems and the more expensive, factory fabricated fascia systems on the market today. GF One Edge provides all the benefits of:

- ▶ Factory Fabrication and Quality Control
- ▶ Quick Delivery and Fast, Easy Installation
- ▶ 11 Standard Express Colors
- ▶ Wind, Watertight and Finish Warranty Coverage
- ▶ ANSI/SPRI ES-1 Compliance (Now Required by the IBC in All 50 States*)

*As published in the International Building Code (IBC), 2003, 2006 and 2009 editions, Section 1504.5 Edge Securement For Low Sloped Roofs. Go to www.spri.org and www.nrca.net for more information.

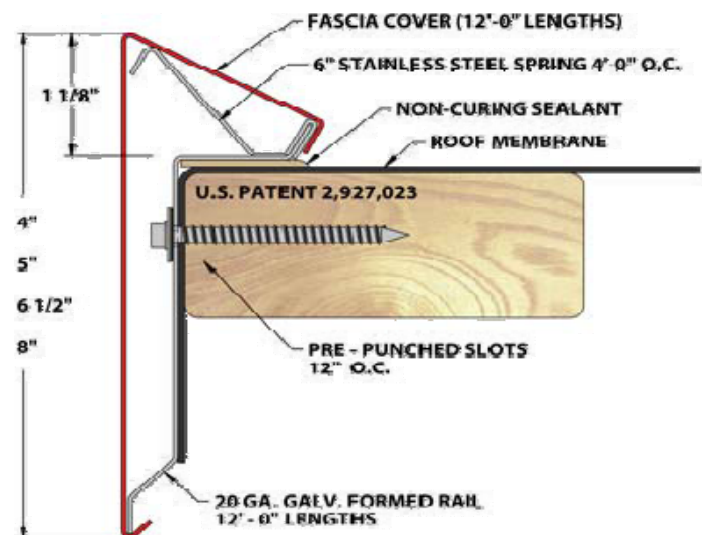

The keys to the GF One Edge Fascia System are its simple design, its availability, its fast installation and its warranty coverage.

Design

- ▶ **Base Rail** - 20 Gauge galvanized steel, one piece base rail with stainless steel fasteners and sealing washers for maximum corrosion resistance and watertight installation. Available in four standard face widths – 4", 5", 6-1/2" & 8".
- ▶ **Spring Clip** - Stainless steel, installed every 4 ft. to support fascia cover and eliminate "oil canning".
- ▶ **Fascia Cover** - Kynar Finished Steel in 11 Express Colors. Easy snap-on installation eliminates having to strip-in the flange of traditional shop fabricated fascia systems.

Availability

The base rail is stocked at your GenFlex Distributor for immediate shipment or pick-up along with your membrane, insulation and accessories. This eliminates the need to "nail-off" the membrane while you wait for a separate crew to install a shop fabricated fascia system or delivery of a traditional pre-fabricated system. You're secure and watertight right away. Additionally, all of our 11 Express Colors are stocked and ready for next day shipment!

Installation

There is no need to install a traditional continuous cleat, fascia cover and separate stripping membrane, and all the extra products that you need to do all of this. GF One Edge installs in three simple steps:

Warranty Coverage

GenFlex Full System Warranty - Your warranty coverage extends from one edge of the roof to the other for a period of up to 20 Years.

- ▼ **Wind Warranty** – The GF One System has been tested to a design pressure of 200 lb/ft² to comply with the International Building Code (IBC). A 100 mph Wind Warranty is available for all installations when installed according to our installation instructions and details.
- ▼ **Finish Warranty** – A 20 Year Kynar Finish Warranty is available with GF One Edge.

For additional information on GF One Edge, please visit www.GenFlex.com or contact your Territory Sales Manager or Representative.

Thank you for your continued support of GenFlex.

Sincerely,

James E. Burkett
