Subject: New Product – GenFast™ GypTec Fastener and Plates

GenFlex is pleased to announce a change of fasteners used to attach GenFlex Insulation and Membranes to cementitious wood fiber or gypsum decks. Effective immediately, GenFast™ GypTec Fasteners and Plates will replace the existing NTB Fasteners and Plates.

The GenFast GypTec Fastener is a glass-filled nylon auger type fastener with a 1 inch head. It features a wide buttress thread design for excellent pullout resistance and tabs that lock the plate to the head of the fastener. An internal ¼" square drive assures fast and easy installation.

The fastener is used with the GypTec Insulation Plate, a 3" (76.2 mm) round steel plate, and the GypTec Seam Plate, a 2" (50.8 mm) round plate used for membrane attachment. The GenFast GypTec Fastener is Factory Mutual (FM) approved and is available in lengths from 2 ½" to 12 ½" (63.5 to 317.5 mm).

Please note that these fasteners will be non-stocked products. The following information can be used for ordering these new fasteners:
