

Position insulation to enable securement into the steel roofing panels to ensure positive attachment. Do not attach to the ribs. For fastener spacing criteria on projects with less than 300lb (1,334 N) of pullout resistance, refer to the **Pullout Value Matrix Table** within the **Metal Recover Specification**. On projects with greater than 300lb (1 334 N) of pullout resistance, reduced securement patterns may be applicable if minimum insulation thickness requirements are also met. Contact GenFlex Technical for information on reduced fastening patterns.

Fully Adhered Metal Recover System Insulation Cross Section

EPDM Systems

ACCEPTABLE SYSTEMS:
Fully Adhered

MAXIMUM WARRANTY: **20 Years**

ISSUE / REVISION
