ISSUE / REVISION DATE:
10-27-2015

NOT TO SCALE

GenFlex EZ TPO Membrane Beyond

Sacrificial Layer of TPO Membrane Hot Air Welded to the Deck Membrane Tightly Against Curb Transition. 1 1/2" Min. (38 mm) wide welds to adjacent membrane panels installed on all four sides of curb and extending out 3' (914 mm) from curb.

Flash curb according to GenFlex Details.

1 1/2" Min. (38 mm) Hot Air Weld

GenFlex Edge Sealant Between Sacrificial Layer and Curb Flashing on All Sides

While this detail will help mitigate contamination damage to the TPO membrane, it is no substitute for proper containment equipment and rooftop maintenance.
