Description

GenFlex HD ISO is a half-inch (13 mm) thick polyiso insulation designed for use as a cover board. It is a high density, closed cell, polyisocyanurate foam core that has been manufactured with a coated glass facer on both sides. GenFlex HD ISO provides high thermal performance.

All GenFlex polyisocyanurate insulations use EPA accepted blowing agents and incorporate an HCFC-free blowing agent that does not contribute to the depletion of the ozone (ODP-Free).

Code Approvals

- FM4470
- UL 790
- UL Classified

Method of Application

Insulation shall be neatly fitted to all roof penetrations, projections and nailers. No more insulation shall be installed than can be covered with membrane and completed before the end of each day's work or before the onset of inclement weather.

GenFlex HD ISO Cover Board can be applied over:

- Existing roof surfaces
- Under fully adhered or mechanically attached Single-Ply
- Modified Bitumen systems applied in Multi-Purpose MB Cold Adhesive and BASEGARD™ SA base sheets with a torch applied cap or SBS sand backed cap sheet in hot asphalt

GenFlex HD ISO Cover Board must be installed using GenFlex Fasteners and Plates or one of the following GenFlex insulation adhesives:

- GenFlex ISO Bond
- GenFlex One Step

Storage

Keep insulation dry at all times.

Precautions

- Elevate insulation above the deck or ground.
- Combustible.
- Do not install over wet, damp or uneven substrates.
- Do NOT install when wet.
- Do NOT torch apply membranes to GenFlex HD ISO cover boards
- Do NOT use hot asphalt to attach or apply asphalt roofing systems to GenFlex HD ISO cover boards
